ACCELERATED LAW PROGRAM

Stevens Institute of Technology offers a six-year combined Bachelor's/J.D. degree program for students interested in pursuing the accelerated law option. After three years of study at Stevens, students are able to begin their first year of law school at either New York Law School or Seton Hall University School of Law, depending on the program they have selected. Upon successful completion of the first year of law school, Stevens awards the B.E., B.S., or B.A., depending on the chosen major. Students then complete the remaining two years of law school, earning the J.D. degree from the law school they attended.

ADMISSION REQUIREMENTS

In order to be considered for the Accelerated Law Program, students must meet the regular Stevens admissions requirements along with the following:

- SAT score of least 1350 or a score of 30 on the ACT.
- A high school GPA of at least 3.7/4.0.

Additionally, students must maintain a 3.2 GPA at Stevens and meet the minimum score required on the LSAT as determined by the chosen law school.

PRE-LAW MINOR

The courses included in the Pre-Law and Public Policy minor provide students with opportunities to study and examine the many facets of law and the legal system. Special attention is given to areas such as patent law, science and the law, corporate law, and public policy. In addition to pursuing law school, students who obtain the minor are equipped to excel in any profession where knowledge of the law and public policy is critical.

PRE-LAW SOCIETY

The Stevens Pre-Law Society hosts a number of events throughout the year, including job fairs, public debates, along with presentations and panels that bring to campus many of our alumni who have gone on to successful legal careers.

LAW SCHOOL ADVISOR

Stevens has a designated pre-law advisor to help students throughout their undergraduate studies and law school application process. Advising is available to all accelerated law and pre-law minor students and also includes course advising, LSAT preparation, and law school research.

FACULTY

Stevens faculty represent a broad range of scholarly interests in science, technology, policy, and law. The faculty are actively involved in academic communities and law firms and are eager to engage students in the classroom, on and off campus.

ABOUT STEVENS INSTITUTE OF TECHNOLOGY

Stevens Institute of Technology, The Innovation University®, is a premier, private research university situated in Hoboken, N.J. overlooking the Manhattan skyline. Founded in 1870, technological innovation has been the hallmark and legacy of Stevens’ education and research programs for more than 140 years.
