ISPE NEW JERSEY CHAPTER

Wyeth Research Tour – South Brunswick **BMS System Applications** **Thursday, January 13, 2005** **South Brunswick, New Jersey**

The Wyeth Research South Brunswick location is a 354,500 square foot research center whose focus is discovery phase research in the neuroscience therapeutic area. The facility was first occupied in 1983 and has biology, medicinal chemistry and analytical laboratories along with office and other support areas.

Since the original construction in 1983 the site's BMS system has been upgraded numerous times and has been utilized in several creative applications that have enhanced the building operation and reduced energy consumption through innovative control strategies. This session will focus on some of these operational / control strategies and results Wyeth has experienced.

Please note: The presentation and tour will be limited to the *first 70 people* who respond.

Pre-registration is required and *walk-ins will not be permitted.*

Host Speaker: **Stephen Fries - Research Facility Operations**
Wyeth Research

Speakers: **Charles Harding - Plant Operations & Maintenance**
