

The Nouveaux Connection group researched the hospitality industry, and more specifically how to develop a template and devise a business plan that will aid corporate sponsor **Myndig Corporation**; which is interested in constructing and operating a profitable bed and breakfast. The cost efficient business plan was designed so that it can be utilized to facilitate the process of steps that are involved in the development of a bed and breakfast.

The purpose of this design project was to utilize the engineering skills that the group has obtained from their education here at Stevens Institute of Technology and to apply them to a real world situation. The application of analytical thinking, computer skills, and collaborative teamwork produced a comprehensive design project.
