Connecting a Personal Device to HP Elite Display

1: Turn on the display by tapping the power button on the front of the display.

2: Plug the HDMI cable right under the display into your device. (Adapters for various types of devices are available at the Circulation Desk)

3: Turn off the display when you are done by pressing the power button again.

Adapters for Connecting Various Devices

Simply plug the HDMI cable connected to the Elite Display into the female end of the adapter. Then plug the male end of the adapter into your device. For the HDMI to Lightning Adapter, you can charge your iPhone while mirroring to the Elite Display by plugging the Lightning end of your charger into the Lightning port next to the HDMI port on the adapter.
