To: The Stevens Community  
From: Division of Facilities and Campus Operations  
Date: January 8, 2019  
Subject: Gatehouse – Gatehouse Dismantling Project

**Construction Notice**

Project Name: Gatehouse Dismantling Project

*What work is being done?*

The Gatehouse, along with two stone monuments and dedication plaques will be fully dismantled and stored for future re-construction. These stone structures and metal gates will be completely dismantled and removed from the Stevens campus.

*When will the work occur?*

Friday, January 11th through Friday, January 25th

*Why is this work happening?*

The Gatehouse was struck by a delivery truck on August 5, 2018. It has been determined that the stability of the structure was compromised, posing a safety risk to pedestrians and vehicles in the area. The structure will be fully restored and re-built at a future date following completion of construction activities for the new Student Housing/University Center project.

*How will this work impact the Stevens Community?*

The south end of the campus around the Gatehouse will be fenced off during the dismantling process. Pedestrian and vehicular traffic will be redirected.

*Who will be performing the work?*

Aegis Restuaro, LLC, (an architectural preservationist and conservator), will be performing the work under the supervision of the Facilities Management staff, as well as our preservation architect, The Architectural Preservation Studio.

*Who should I direct questions?*

John Lanza  
Operations Manager  
Division of Facilities & Campus Operationsjlanza@stevens.edu
