

Hoboken Guided Tour App

This project's goal is to create a user friendly application that is readily available to anyone with a Smartphone who would like to know more about Hoboken along with Stevens Institute of Technology and familiarize themselves with the town and school. It will easily allow the user to select what they wish to know about Hoboken and be guided on a tour that showcases the major focal points of the town.

This project idea came from the Dean of Student Life, Dean Nilsen. There was a need for an app that could show and guide parents, students, and potential future students through the culture, history, and life in Hoboken and Stevens. From this app, the team hopes that people will be more able to navigate Hoboken and have a greater and more in depth knowledge of the town that has so much in such a small area.
