

Project Name: SSE Graduate Study Plan Management System

Team Name: Paperless

Team Members: Sienna Batzli, Gary Boardman, Daniel Frischman, Eden Jacob, Mike Kressaty

Executive Summary

There are over a thousand students enrolled in the various SSE graduate programs at Stevens Institute of Technology. All graduate students are required to fill out their Masters' study plan, receive approval from their advisor and then submit it to the registrar. While it sounds simple, the process, management and follow-up procedure is entirely paper-based, manual and inefficient.

The team has developed a paperless concept to create, manage and approve study plans using a database system at the back end and a website for user interface. The goal of this project is to create an automated and paperless solution that will replace the current process in order to increase efficiency and reliability for students, faculty and administrators.
