Why We Have Identity Standards

Stevens Institute of Technology is intently focused on leveraging our institutional assets, culture of collaboration and expertise in key fields to make transformative advancements that solve pressing global challenges. Since the implementation of the university’s strategic plan began in 2012, members of the Stevens community have shown dedication and commitment to moving the university forward. Third-party recognition of Stevens' value and ROI continues to surge; major national and international media outlets seek Stevens faculty expertise and report on our research advances; career outcomes for Stevens graduates remain among the best in the nation; applications and enrollment continue to increase. In short, demand for a Stevens education, and for the expertise Stevens graduates bring our world, has never been higher.

To sustain this distinction – and to grow the prestige and recognition of the university – presenting a clear and consistent identity is more important than ever. When Stevens is presented as one cohesive brand, we create a connection that gives memorable definition to Stevens in the eyes of the public. This consistency protects our image, enhances the value of our name and builds a foundation for successful branding.

By adopting a common graphic identity system, we reinforce the breadth of our teaching, research and engagement, visually linking all aspects of this remarkable institution. Our logo, university seal and mascot connect our university with an ever-growing population of friends, partners, supporters, alumni and the next generations of our community.

"Good brands are fractal. Every interaction you have reflects the interaction you'll have with every other piece of the whole, as well as the whole itself."

— Diego Rodriguez, Global Advisory Board, Harvard Business School
One of the most effective and efficient ways to establish a clear and understandable connection among communications efforts is the consistent and standardized application of the university identity system. The identity system defines, regulates and encourages the use of a set of graphic elements in order to clearly and consistently mark communications with the Stevens brand.

Consistently following the university identity system is a crucial part of establishing and reinforcing the Stevens brand.

Adherence to the identity standards is required for all external communications produced by, for and on behalf of the university. Guidelines with regard to use of the Stevens logo must be adhered to in all cases of logo use, both internal and external.
The Stevens Logo

There are three official Stevens logos: primary, stacked and circular. The vector formats are AI, EPS and SVG. The pixel format is PNG. All formats are available in the download section at stevens.edu/brandguide.

1a. THE PRIMARY LOGO
The Primary Logo should be used in most situations.

1b. THE PRIMARY LOGO - BLACK
For situations when only black is available or appropriate.

1c. THE PRIMARY LOGO - RED
For situations when one red color is available or appropriate.
The Stevens Logo (continued)

1d. THE PRIMARY LOGO - WHITE
For situations when the logo is to be reversed out of a solid dark color background or the dark section of a photo.

It’s important to note that the WHITE LOGOS has unique features that relate directly to the graphic representation of Edwin A. Stevens Hall in the shield. For this reason, only these logos should be used for white or reversed-out printing; no other logos should be converted by a designer, vendor or anyone to simulate the WHITE LOGO.

Identifying unique features

In the shield section of the BLACK LOGO, please note the roof of the building is black while the facade is white. Fig. 1

In the shield section of the WHITE LOGO, please note that as all the other graphic elements have changed color, the roof remains black and the facade remains white. Fig. 2

Fig. 3 is an incorrect representation of the white logo, where the BLACK LOGO was reversed to attempt the effect of looking like the WHITE LOGO.

For this reason it’s very important to use or provide the correct logo when it is reversed out of a solid dark color background or the dark section of a photo.
2a. THE STACKED LOGO
The Stacked Logo should be used in cases where the design of the final piece is improved by the centered logo.

The Stacked Logo is also available in BLACK, RED and WHITE.

All are available in the download section at stevens.edu/brandguide.

3a. THE CIRCULAR LOGO
The Circular Logo is provided as an additional option to the Primary and Stacked logos for use on merchandise and specific signage only.

The Circular Logo is also available in BLACK, RED and WHITE.

All are available in the download section at stevens.edu/brandguide.
Choosing an Appropriate File Format

**AI (.ai)** files are in the native format of Adobe Illustrator. They are entirely scalable vector files that provide high-quality, smooth-edged reproduction. They are also constructed using artboards, which allows for all the styles (4-Color, BLACK, RED and WHITE) to be contained in one file instead of separate files.

**EPS (.eps)** files are also entirely scalable vector files that provide high-quality, smooth-edged reproduction. There are separate files for each logo type (4-Color, BLACK, RED and WHITE).

**SVG (.svg)** files are a generic vector format that are suitable for websites and software application that work with vector data such as AutoCAD, CATIA, Rhino, etc.

**PNG (.png)** files are relatively small raster image files that can be scaled down successfully, but should never be scaled up. As a general rule, use PNG files for web/online applications and AI or EPS for everything else. *Note:* PNG format files replace the previously used JPEG (.jpg) files as they are intended for graphics that have an established number of colors and clean edges. PNG files can also have transparent backgrounds, but JPEG files cannot.

Using The Files

Do not attempt to open or modify the logo files. Rather, you should "import" or "insert" them into your document. Once a logo is in your document, it may be too large for your desired use — in this case resize the logo, making sure the aspect ratio is locked to ensure the logo is not distorted with the size change.

Versions of every logo are available in the download section at stevens.edu/brandguide.
Individual Logo Elements

The Stevens logo is a compound of two elements. They are identified as S-Shield and S-Main. These elements will be referred to by these names throughout this guide.

Using the Elements Individually

When using individual elements, please contact the Division of University Relations to review options before printing or ordering items. The following guidelines define permissible usage of the individual logo elements:

**S-Shield**
The S-Shield should only be used in places where the full logo is unnecessary, such as footers, icons, background images, watermarks, lapel pins, etc. The smallest size the S-Shield can be reproduced is 1/2 inch. The S-Shield can be used in full color (A) or black and white (B). For specific situations it can be used as a background watermark in a light percentage of black (C). Note: The S-Shield should never be smaller then 1/2 inch in height.

**S-Main**
The S-Main should only be used in applications where the quality of the shield in the Official Logos would disintegrate to the point of being unreadable. There are certain situations where S-Main can be used without the tagline "The Innovation University®"; they are specific to producing small promotional items and should be reviewed by the Division of University Relations. Note: The S-Main should never be smaller then 5/8 inch in height.

Please contact the Division of University Relations for the S-Shield and S-Main assets.
**Logo Clear Space**

The Stevens logos are most effective when surrounded by a correct proportion of open space. A minimum amount of **clear space** equal to at least **two times (double) the vertical height of the "institute line"** must be maintained on all sides of the mark.

All Stevens logos now include this **clear space** directly in the file.

The following instruction can be used to manually create the proper amount of **clear space**.

**Fig. 1**
Establish the perimeter of the logo and determine the vertical height of the "institute line."

**Fig. 2**
Calculate **two times (double) the vertical height of "institute line,"** and add that amount as padding area surrounding the logo.

**Fig. 3**
The amount of padding in the end result should resemble this example.

The formula is: \( \text{Clear Space} = 2X \text{"institute line"} \)
Logo Clear Space (continued)

Because the technique is based on a proportional relationship, it can be applied to any size as well as the STACKED LOGO.

**Fig. 1**
Once again, calculate two times (double) of the vertical height of "institute line," and add that amount as padding area surrounding the logo.

The formula is:  \( \text{Clear Space} = 2 \times \text{"institute line"} \)

The Circular Logo uses a different formula because of its shape and design elements.

Measure the diameter of the entire logo.

Divide the diameter by eight and add that 1/8 (one-eighth) amount as padding area surrounding the logo.

**Fig. 2**
The amount of padding in the end result should resemble this example.

The formula is:  \( \text{Clear Space} = \frac{1}{8} \text{the diameter} \)
Logo Placement

The preferred placement of the PRIMARY LOGO is top left. The minimum distance to the edge of a page can be determined by a method similar to determining clear space.

**Fig. 1**
Establish the perimeter and determine the **vertical height of the entire logo**.

**Fig. 2**
Divide that height by **four**. The result, **25% (one-fourth)** of the vertical height, becomes the distance that the logo is positioned from the top and left edges.

While top left is the preferred position, this method can be used for positioning the logo in any corner of a page.

Because the technique is based on a proportional relationship, it can be applied to the STACKED LOGO as well.

The formula is:  

\[
\text{distance to edge} = \frac{1}{4} \text{ logo height}
\]
**Logo on white background**

When printing on paper or another white background, use either the four-color or PMS versions of the Stevens Logos 1a, 2a or 3a (presented on pages 5-7). If you plan to print on transparent surfaces, wood, metal or other non-standard printing surfaces, contact the Division of University Relations for guidance.

**Logo on light color background**

If printing on a light-colored, non-white surface, you may opt to use the **BLACK LOGOS**. In cases where sufficient contrast and readability is certain, you may use the **RED LOGOS**.

**Logo on dark color background**

When printing the logo on a dark color background (e.g., Stevens Red, charcoal gray, etc.) the reversed **WHITE LOGOS** should be used. This logo should also be used when the Stevens logo is being projected as light onto a surface.

**Logo overprinted on photos**

Whenever possible, avoid printing the logo on top of photos or images. In cases where this is necessary, **only** use the **WHITE LOGOS**. The full-color logo should NEVER be placed on top of photos or images. To ensure readability, the **WHITE LOGOS** should be used on a dark photo or in a predominately dark area of a photo. It should **not** be used over a pattern in a photo that would obscure its clarity.
**Improper Logo Representation**

Never reproduce the logo by progressive photocopying, redrawing or retracing, as these actions degrade quality and introduce inconsistency, thus destroying the logo’s unifying function. Although strict rules cannot be given, some general guidelines about the immediate graphic environment of the mark have been established.

- **DO NOT** add text or graphic elements.
- **DO NOT** change or add colors or outlines.
- **DO NOT** change the aspect ratio proportions or skew the appearance.
- **DO NOT** change the size and/or placement of the elements.
- **DO NOT** change the typefaces.
Improper Logo Usage

When the name of the university appears in running text, it should be typeset per the rest of the paragraph, using title case: Stevens Institute of Technology. At no time may the logo, or any portion of it, appear within running text. Additionally, no attempts should be made to recreate the font and style of the Stevens logotype within text.

The first reference to the university should use its full, proper name. Subsequent occurrences can simply refer to "Stevens":

- Stevens Institute of Technology (first reference)
- Stevens (subsequent references)
- Mix "the university" in during subsequent references.

Never refer to the university as:

- "the Stevens Institute of Technology."
- "SIT"
- "Stevens Tech" (exception for the Stevens Alma Mater, #stevenstech hashtag or other legacy titles)
- "the Institute"

Founded in 1870, technological innovation has been the hallmark and legacy of our education and research programs for more than 140 years. Within the university's three schools and one college, more than 6,100 undergraduate and graduate students collaborate with more than 350

STEVENS is home to three national research centers of excellence, as well as joint research programs focused on critical industries such as healthcare, energy, finance, defense, STEM education and coastal sustainability. The university is consistently ranked among the nation's elite
School/College Logos

For visual consistency and brand unification, a construct has been developed when identifying schools within Stevens. All school logos are created by the Division of University Relations and are provided to schools for use. Identity guidelines for the primary logo including clear space, color and usage still apply (see pages 10-11).

The primary or stacked versions of the logos can both be used for school branding.

**Fig. 1**
Primary versions with clear space indicated.

**Fig. 2**
Stacked versions with clear space indicated.
Research Centers, Groups & Alliances

To ensure consistency, the Division of University Relations is the sole source for creating, managing and distributing sub-brand marks and logos for any university-affiliated group.

For research centers, alliances and groups we offer the opportunity to have a typeset lock-up with the Stevens word-mark to connect with our identity for external brand recognition. The name is displayed using the Trade Gothic family of fonts (a Stevens brand typeface).

Fig. 1  
Example shown: Center for Neuromechanics

For centers, groups and affiliates that use established acronyms as their primary naming convention, we offer the opportunity to have a typeset lock-up with acronym, the name and the Stevens word-mark.

Fig. 2  
Example shown: WiMoLab, Wireless Communications and Mobile Computing Lab

Note: Due to the nature of a pure type solution, the location of the word mark is limited to the one-line bottom option.
GRANDFATHERED MARKS
In some cases, research centers and groups developed branding prior to the revised identity guidelines. These branding marks will be grandfathered into the identity system. Only grandfathered marks may follow this convention. All new marks must be developed according to the new standards shown on page 17. Grandfathered marks are allowed for these centers:

- Center for Complex Systems & Enterprises
- Center for Healthcare Innovation
- Center for Quantum Science and Engineering
- CIESE
- Hanlon Financial Systems Center
- Lore-El Center for Women's Leadership
- Samuel C. Williams Library
- Stevens Institute for Artificial Intelligence
- Stevens Venture Center
Creation of New Marks

While logos and symbols are not the sole elements of a "brand," they are its visual representation and extension. A proliferation of independent, decentralized identities and symbols creates confusion in the minds of audiences whose support we seek: students, prospective students, parents, alumni, neighbors, legislators and donors, as well as faculty, staff, trustees and other internal audiences. **For this reason, it is imperative that all materials representing Stevens, its programs, research, projects, events and initiatives carry an approved Stevens logo as a primary mark of distinction to represent the university.**

Additional logos or marks for units, programs, events or initiatives should not be developed.

In certain special cases, when a distinct brand or logo is needed, involvement of the Division of University Relations from the beginning of the process is required. The creation of new logos and marks that represent the university will only be granted under specific unique circumstances. Involvement of the Division of University Relations extends to initiatives where the Stevens brand is not primary or integrated due to terms of the partnership or grant involved.

Using the Stevens logo gives your department, organization or event the advantage of being a part of the overall institutional identity. This in turn helps build, reinforce and solidify the university brand.

Co-Branding

Partnership is a critical aspect of Stevens – collaboration is "business as usual." This can present instances where co-branding is needed. Co-branding is an umbrella term for many relationship branding connections. As used in this guide, co-branding is the use of one or more trademarks from two or more companies for the marketing of specific programs, services or events. Examples include joint ventures or joint marketing opportunities. Co-branding must always be approved by the Division of University Relations. Some basic principles when considering co-branding:

- In most instances, the Stevens logo should be at least of equal size and distinction as other partner logos.
- The Stevens logo should be placed at a prominent position in the layout.
- The logo must always be clearly legible, keep its original proportions and adhere to the logo-use specifications outlined in this document.
- When the Stevens logo is utilized by a partner organization, its use should be reviewed and approved by the Division of University Relations.
The Stevens Seal

The Stevens Seal has reserved usage for the Office of the President and large-scale university initiatives.

Several options have been created to emulate the actual metal seal that appears on select campus buildings.

For this reason, it is only available by contacting the Division of University Relations.
Stevens Legacy Identity Colors

Color is an integral part of the Stevens identity and a central component of the branding strategy. In order to reinforce logo and brand recognition, the color guidelines provided here should be followed as closely as possible across all media.

Guidelines

The official school colors of Stevens Institute of Technology are red and gray. A Stevens color palette has been established to ensure consistency in reproduction. Refer to the charts on the right when selecting colors.

Print Color Specifications

With an increase of digital printing options, Stevens has shifted focus to establish a standard 4-color CMYK formula for Stevens Red and Stevens Gray. This chart provides the correct specifications to relay to vendors to ensure accurate brand color reproduction and maintain consistency. Please note that the CMYK formulas provided should be used at all times; do not use any other formulas. Also be aware that there are four different color options for Stevens Red, as it reproduces differently depending on the type of paper used. The use of Pantone Matching System (PMS) colors will be reserved for specific situations and is no longer the primary representation for Stevens Red and Stevens Gray. Concerns and questions should be directed to the Division of University Relations.

Web/Digital Color Specifications

Digital color can be reproduced with two methodologies: hexadecimal values (hex) and the Red, Green, Blue color model system (RGB). These two systems are interchangeable in that they both represent the same wavelengths of color. This chart provides the correct specifications to relay to vendors to ensure accurate brand color reproduction and maintain consistency.

When assigning colors to text in Microsoft Word, select "More Colors," then "Custom," and insert the above values using the RGB color model.
Secondary, Accent and Light Colors

There are currently **10 additional** colors that have been developed to extend the palette. These additional colors are intended to be used to complement the legacy colors of red and gray. They may be used to accent or accompany the legacy colors in a design, but not to dominate the entire color palette.

4 **Secondary** - These colors can be used along with the legacy colors, but should not become dominant.

2 **Accent** - These colors can be used along with the legacy and secondary colors. Use these colors sparingly in supportive design elements.

4 **Light** - These colors are meant be used with all the colors in the palette when a light tone is needed. Use these colors instead of creating light percentages of the other colors.

The chart to the right identifies the **four-color** breakdown and **hexadecimal** values for each of these colors. RGB values can be obtained from the hex values.

(Note: Values provided are for use on coated papers; for values specific to uncoated and specialty paper, please contact the Division of University Relations.)

Please contact the Division of University Relations if you have specific questions or concerns regarding color usage for a project.

Attila The Duck

Attila is the official Stevens Institute of Technology mascot.

The colors used are specifically:

- Dark blue outline: PMS 648C
- Feather shadow: PMS 7506C
- Bill, legs, feet: PMS 715C
- Foot shadow: PMS 201C

Stevens Collegiate "S"

The traditional collegiate "S" is an additional element that is often used with Attila or in some cases by itself when directly related to the athletics department.

It has been approved for use on apparel available from the campus bookstore.

More details on merchandise and apparel can be found on page 36.
Typeface (Font)

The official Stevens typeface is Trade Gothic. Permissible fonts in the Trade Gothic typeface:

- Trade Gothic Regular & Oblique
- Trade Gothic Bold & Bold Oblique
- Trade Gothic Condensed #18 & Condensed #18 Oblique
- Trade Gothic Bold Condensed #20 & Bold Condensed #20 Oblique

This typeface is to be used in all official print communications disseminated by the university. Exceptions are allowed for certain digital communications, such as emails, as there are font limitations in some platforms.

Guidelines

Legibility and consistency are the primary concerns when setting type. Extended and condensed fonts should be used sparingly — e.g. in tailored headlines. The oblique font should be used to represent italics when grammatically needed. Bold is appropriate for subhead and callout text.
PowerPoint Typeface (Font)

The Stevens PowerPoint template, available at stevens.edu/brandguide, uses Arial as its primary font. How PowerPoint presentations render is dependent on the library of fonts installed on the computer used to open them. Arial is commonly available with Microsoft products (whether running on Windows or Mac OS). If the device you are presenting this font on runs MS Office products, this font should be installed and available, and the PowerPoint design will consistently display exactly as intended.

In the event that Arial is not installed or has been removed from a computer, you can download it at the following link:
https://docs.microsoft.com/en-us/typography/font-list/?FID=8

To install fonts on your system:

Mac
- In the Finder, navigate to folder Macintosh HD > Library > Fonts
- Drag and drop font files into the Fonts folder
- Restart PowerPoint to load the new font

Stationery System

Stationery serves as an important communication link between Stevens Institute of Technology and its audience. All university units will use the standard stationery items defined here for correspondence and outreach.

The stationery system comprises letterhead, envelopes and business cards. Individual names appear on business cards, but not on letterhead or envelopes. Appropriate school, office, division, department or program names should be included on business cards, letterhead and envelopes.

ORDERING STATIONERY

At this time, university offices may order business cards, letterhead and envelopes by contacting the third-party vendor PermaGraphics directly at 201.814.1200. PermaGraphics is the only approved vendor for supplying stationery to the university. A quote and purchase order are required for all orders.

PAPER STOCKS

For standard stationery items, the following paper stocks are used:

<table>

Email Signature Guidelines

All university email signatures should contain name, title, department, school or college (if appropriate) and contact information set in Arial, followed by the standard sign-off as depicted in Fig. 1 and Fig. 2 on right.

An HTML template is available at stevens.edu/brandguide
Video Production

Any video production at Stevens that is intended for public release should conform to the following standards when possible:

**Shot in 23.98 H.264, 1920 x 1080 (16:9)**

Begin with the official Stevens logo introduction slate:

![Slate with Stevens logo](image)

For lower thirds, we use the Stevens logo on a white background, with the text in white over a gray background with a gradient fade-off:

![Lower third example](image)

If used, titles should be placed within standard 16:9 title safe area:

![Title Safe](image)

Conclude with a slate with calls to action for our social media channels:

![Slate with social media calls](image)
STANDARDS -> ENVIRONMENTAL GRAPHICS AND SIGNAGE

Interior and Exterior Signage

For consistency, environmental graphics and signage must adhere to Stevens' visual identity system and must be approved by both the Division of University Relations and the Division of Facilities and Campus Operations prior to ordering. The Division of Facilities and Campus Operations is responsible for installing, or arranging the installation of, all interior and exterior signage. See **Fig. 1**.

Signage Requests

Signage project requests should be directed to the Division of Facilities and Campus Operations:
FacilitiesPlanning@stevens.edu
201.216.3553

![Stevens Institute of Technology](image-url)
Displays

Appropriate university branding, including the Stevens logo, should be prominently used on displays for major conferences and installations.

A Stevens exhibit has been developed that is customizable for exhibit spaces ranging from 10'x10' to 10'x40'. With proper notice, the exhibit can be configured, shipped and set up for conferences at the expense of the requesting department. Costs vary depending on destination and configuration. Requests for estimates should be sent at least three months in advance of show dates to the Division of University Relations, and should include basic information about the show, including specific location, dates and a link to the show's exhibitor services guide.

Full four-panel option

Three-panel option

Two-panel option
Podium Signage

The university logo should be prominently displayed on podiums for major conferences, convocations, symposia and other major presentations. Fig. 1

Name Tags

Templates for name tags used at conferences, workshops and other Stevens events are available by contacting the Division of University Relations. Fig. 2

Vehicles

All Stevens Institute of Technology vehicles that display a logo must conform to the Stevens visual identity system. The Stevens logo should be displayed on the front door panel of a car, van or truck and may also appear centered on the rear of the vehicle, and it must be printed in Stevens' official colors. The color of the vehicle would determine whether the FULL COLOR LOGO, the RED LOGO or the WHITE LOGO would be used. The Stevens Campus Police department is exempt from these vehicle logo standards. Fig. 3
Presentations

Presentations, including those using PowerPoint, should reflect and maintain the Stevens Institute of Technology visual identity, using the approved PowerPoint templates developed by the Division of University Relations. The templates, as well as a user guide for best use and application, are available online at stevens.edu/brandguide.

The Stevens PowerPoint templates are available in both wide screen and standard aspect ratios.
Merchandise and Apparel

Stevens merchandise and apparel offerings generally follow two distinct lines: the university brand and the athletic/collegiate brand. Clothing should either be ordered through the Stevens campus store or produced with prior artwork authorization from the Division of University Relations.

University Brand

The university brand is presented with the Stevens apparel logo (see Official Logo Family), the shield or the official logos, depending on the item. Fig. 1

Athletic/Collegiate Brand

The athletic/collegiate brand features a traditional collegiate "S," often embroidered in Stevens red, gray or white depending on the background material and color.

In addition, the word "STEVENS" in the same style lettering is used in an arch with a specified radius to ensure consistency across all suppliers. Fig. 2

Color

Color selection for apparel and merchandise logos should follow the graphics standards specifications outlined in this guide.
Athletic Department Apparel and Uniforms

Athletic block lettering is appropriate for Stevens athletic apparel. It is also acceptable to use the Stevens name in *Angleterre Book Regular* font, in all caps. *Fig. 1*

It is encouraged that team uniforms incorporate the shield portion of the Stevens logo. Optimal placement might include:

- On the sleeve
- On the back of the jersey, below the neckline

Jersey Color and Shield Specifications

- If your team jersey is white, use the full-color shield.
- If your team jersey is black, use the white shield or the full-color shield.
- If your team jersey is red, use the white shield.

Please note: Because of the complexity of the shield, embroidery is not recommended and may cause distortion of the mark. Some vendors may not be able to properly embroider it. Please opt for screen printing, as the shield should render properly when this method is used. *Fig. 2*

Stevens Colors

Please note the Stevens red and gray PMS colors, and communicate these colors to your jersey vendors. *Fig. 3*

- Stevens Red: PMS 201
- Stevens Gray: Cool Gray 7
In order to facilitate adoption, ease of use and consistency across a variety of media, the templates below are available at:
