

Graduate Student Researcher Position

Background

EH Yang Group is an internationally recognized leader in 2D material growth, actively publishing results and establishing collaborations with top-tier research groups around the world. *For more info: google "EH Yang Research Group" for our website.*

Job Description

This unpaid internship is intended for Master's students who are interested in pursuing a cutting edge research opportunity. The candidates will get trained on chemical vapor depositions of 2D materials and will contribute to growth and optical characterization.

Requirements

- Current 1st year Master's students
- No prior experience required; individuals will be trained.
- Willing to make significant time commitment and actively learn research methods
- Willing to pursue a Ph.D
