Option to complete Financial Engineering Master’s degree.

stevens.edu/fsa
THE CERTIFICATE IN FINANCIAL SERVICES ANALYTICS (FSA) provides leading edge skills for financial services professionals and students. The courses (15 credits) in the graduate certificate program are:

- FE 582 Foundations of Financial Data Science with FE 513 Practical Aspects of Database Design (lab)
- FE 590 Introduction to Knowledge Engineering
- FE 595 Financial Systems Technology
- FE 550 Data Visualization Applications
- FE 800 Research Project/Internship

Evening and online classes for professionals.

Apply FSA certificate (15 credits) to earn a Master of Science in Financial Engineering (FE) (30 credits)

THE ACCENTURE & STEVENS FINANCIAL SERVICES ANALYTICS INNOVATION PROGRAM

The Financial Services Analytics curriculum was developed to combine the latest academic thinking with industry proven experience to address evolving analytical needs in the Financial Services industry including aspects of financial big data and data visualization. Qualified students will have the opportunity to participate in internships with Accenture. Scholarships funded by Accenture will be awarded to two students per year to cover tuition and fees for the FSA Certificate program. Visit stevens.edu/fsa

ADMISSIONS

Students who apply for admission to the certificate program must have an undergraduate degree in an engineering, science, finance or related field and prior coursework in calculus, probability and statistics. Knowledge of a programming language is preferred. Preparatory courses are available. Students who plan to pursue a master's in financial engineering must apply separately and must meet additional prerequisites in differential equations, linear algebra and a programming language.

The admissions requirements and application for the FSA program are available at stevens.edu/fsa. Application will also require an official transcript and two letters of recommendation. GRE or GMAT is required for full time students only.
